

## **STOPPING ILLEGAL IMMIGRATION**

**by Frosty Wooldridge**

### 1. Emergency Funding; \$94 billion stand-alone bill needed

We demand President Bush send to the Congress a \$94 billion stand-alone, emergency funding bill -- to pay for fully implementing the enforcement laws already on the books.

### 2. U.S. Immigration Czar needed

We need, for the first time – a U.S. Immigration Czar – serving at the Cabinet level. This competent, compassionate person must take the reins from the five competing fiefdoms (State, Commerce, Labor, DHS, etc) and restore law-and-order. For the immediate future, this Czar must put a 10 year hold on all immigration. During that moratorium, we must revamp the fatally-flawed USCIS.

### 3. U.S. Immigration Strategic Plan needed

The Immigration Czar must quickly draft a U.S. Immigration Strategic Plan to restore our sovereign nation status, and avoid notions such as a "guest-worker" program (never worked anywhere). Instead, we must quadruple our university system to train our own knowledge workers.

At the same time, we must restart the tried-and-true CCC, with an exciting moniker ( CCC-2020) to train high-quality manual laborers and heavy equipment operators while we upgrade our infrastructure and National Parks and State Parks and County Parks everywhere.

In addition, we must use tax-credits to IMMEDIATELY incentivize the agriculture sector to shift from manual labor to mechanized farming.

### 4. Good fences make for good neighbors

No more fooling around -- assign the job of building the 2,100 mile long World-Class Southern Border fence to the U.S. Navy Seabees -- who will finish the job in two years, under budget. Why the Seabees? They are past-masters and experts in building such fences, AND... they are fully equipped to defend themselves. The fence will reduce the need for border guards by 75 percent.

### 5. Weak Link; U.S. Federal Court Throughput must be Doubled

The key "sticking-point" is the need to restore law-and-order as we double the entire U.S. Federal Court system -- to process all of the criminals. Make this a temporary (seven-year) thing -- no new buildings – night shifts. Yes, we must double the staff... temporarily.

### 6. No new brick-and-mortar prisons are needed

To make room for the scofflaws in our existing jails and prisons, we must do two critically important things;

Revamp our beliefs and approach toward those who use and abuse so-called illicit drugs. We must re-install the so-called protestant ethic AND bite the bullet as we "legalize" certain "recreational drugs" – and control those drugs, heavily taxed and handled just as we do alcohol – perhaps using state-liquor sales stores. This will, if properly done, result in half of those now imprisoned to be placed in "boot camps" as they learn appropriate behavioral processes and practices and return to productive citizenship.

We must build a thousand tent-city jails near our southern border – each equipped with a mini immigration court, with a highly-qualified Magistrate assigned full-time to handle the many issues. As each temporary facility is completed, we MUST use secure bus-vehicles to transport the criminals from the jails-prisons.

### 7. Tough love

To investigate and apprehend the millions of crooked criminals who employ the illegal aliens, we must kick-start a unified effort as we direct that half of the U.S. Marshalls join with half of the DOJ-FBI and all of the U.S. DHS-ICE and the DHS -C&BP as they move to the CONUS interior and work together -- and also find-apprehend the 630,000 absconders

U.S. National Integrity and Ethics: As a key and related part of these combined actions, we must avoid the temptation to abuse the stand-up "migrant laborers" as they voluntarily repatriate -- when their jobs disappear and are restored to the lower- middle-class U.S. citizen taxpayers. As a nation, we want to be measured by our wise mercy and compassion.

#### 8. Southern border: 7 Years, U.S. MARINES

In order to free-up enough Border Patrol Agents to help do that job (7), we must bring the U.S. Marines back from IRAQ and AFGHANISTAN and assign them (just the Marines, nobody else -- there is ample precedent) to patrol and enforce our southern border for seven years. That will effectively quash the "importers." (Trafficking in Drugs, weapons, terrorists, illegal aliens, etc.)

#### 9. Re-Implement the 14th Amendment to the U.S. Constitution

We demand that the Congress pass legislation that "reinterprets" the 14th Amendment -- to put a STOP to the inane practice of granting citizenship to babies born to foreign nationals who are here illegally.

#### 10. No More Omnibus Bills – each bill must stand naked and alone

No more omnibus bills. The House and Senate must stand tall and introduce a series of related but stand-alone bills to deal with the secondary immigration issues. Each 'great idea' must sink or swim based upon its own merits. All bills must be simple, and transparent.

Lies, lies, and more lies – NO MORE HORSE-TRADING!

Item 1 must be fully implemented (\$94 BIL emergency funds authorization, signed by the President) BEFORE the Congress adjourns for the 2007 Summer Recess. Items 2 - 9 must be substantially in-progress no later than October 1, 2007, or sooner.

No other immigration-related legislation can be considered until this "Top-Ten" comes to fruition.

"Let's git 'er done!"
